

OVERVIEW

RPR Graphics Inc. (RPR) is a complete pre-media company in the niche market of retail and consumer brands advertising. RPR's tradition has been to build our success on values such as responsiveness, integrity, and an old-fashioned work ethic. In today's industry of international print conglomerates with perpetual mergers, acquisitions and foreclosures, RPR's heritage of establishing long-term client relationships while remaining at the forefront of new technology, sets us apart from the competition through three generations and 50 years of service.

Our facility is uniquely equipped for the production complexities and high-capacity demands of our client base. Our clients reap the benefit of our R&D support while being sheltered from the up-front burden of "cutting edge" technology. RPR adds value through our ability to integrate new product/service offerings, improve quality, and help our clients integrate new technology painlessly, seamlessly and continuously.

PROCESS IMPROVEMENT INITIATIVES

RPR constantly strives to improve our systems and processes to reduce production costs, which in turn drives down the cost of any printed or web based product. Most procurement teams will look to outsourcing options to keep a company focused on its core competencies and allow companies with domain expertise to manage specialty areas. RPR understands that this philosophy only provides a true value proposition if we take full ownership of outsourced process and all the areas of responsibility that comes with it.

CLIENT RELATIONSHIPS

RPR strategically partners with our clients to provide the solutions they need to achieve their advertising and marketing goals. We enable our clients to keep working on their day-to-day tasks while we implement initiatives simultaneously and without interruption. The team at RPR Graphics are pre-media specialists that deliver service - professional, accountable, customized, top-notch service that allows our clients to consistently manage their production and improve their time-to-market.
