

Do You Know Where Your Digital Assets Are

RPR's eMedia (Digital Asset Management) Solution maximizes your assets. Search, store, and distribute all your digital content with ease . . . 24/7 worldwide.

RPR's eMedia Digital Asset Management solution allows any business enterprise to realize an immediate ROI. Clients are able to lower their media production costs and save valuable time and money. The efficiency of the user-friendly interface helps reduce time to market by streamlining how they collect, access, produce, distribute, and archive their graphic media for advertising, publishing, and corporate communication.

The RPR eMedia solution is a customized visual database of graphics, documents, images, audio and rich media content that can be browsed, searched, viewed, reformatted and shared. We provide our clients with a centralized infrastructure, a plethora of advanced management tools, and the bandwidth capacity to deliver anywhere, at any time.

As the central repository for all digital media, the system is an efficient tool for brand leveraging, point-and-click searching, downloading, uploading and allocation that ensures quick and easy access to any time-sensitive project for all involved parties.

RPR Graphics Inc. has over fifty years of experience mastering graphic file components and has been a pioneer in the industry.

RPRGraphics^{INC.}

FEATURES

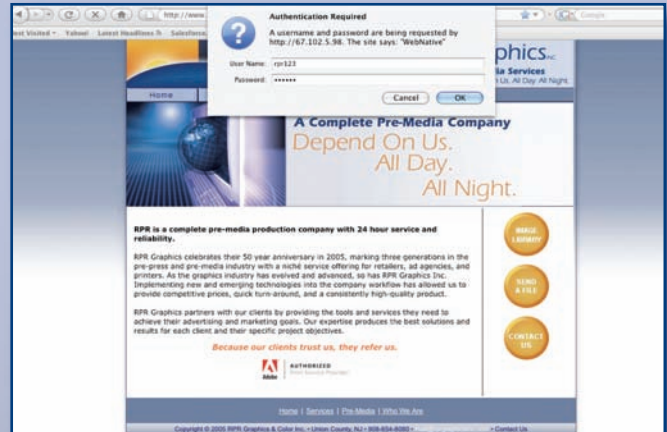

- ▲ Instant digital asset access 24/7 from any web browser
